

California OES Weather Threat Briefing

Sunday, April 14, 2019
9:00 AM PST

Day 1: No impacts expected today

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

04/14/19 - 04/20/19

Sunday-Tuesday

- Precipitation will be confined from northern CA to the Bay Area with dry conditions across the rest of the state.
 - Most of the precipitation will fall on Monday. No significant weather impacts expected.
 - Snow levels are expected to hover around 7000 feet during the day on Monday and fall to 5000-5500 feet overnight.
- Winds will increase across inland and southern California, bringing the potential for minor impacts across the region

Wednesday-Saturday

- Increased temperatures late next week will begin to melt snowpack and will likely led to rises in rivers and streams. No flooding impacts expected at this time.
- Winds will increase across a wider area of southern California, bringing the potential for minor impacts across the region
- Above average temperatures and dry conditions due to offshore flow are expected during the end of the week across Southern CA.
